# Gaurav Kumar

Full-Stack Developer · TypeScript, Node.js / NestJS, React / Next.js

Meiningen, Germany | +49 1772276503 | iamgaurav1993@gmail.com | linkedin.com/in/iamgaurav1993

## PROFILE

Full-stack developer with 6+ years of experience, mainly TypeScript and Node.js backends for B2B SaaS products. Since 2025 I have designed, built and deployed several products on my own, among them a WhatsApp CRM with Stripe billing and a GitHub app that reviews pull requests with an LLM. Living in Germany and available immediately, eligible for the EU Blue Card with a job offer, so no relocation or visa lead time. English fluent, German A2 and improving.

## PROFESSIONAL EXPERIENCE

**Independent Software Developer** 03/2026 – Present

*Germany*

- **LeadLoop** (getleadloop.app), a multi-channel CRM built with NestJS, Next.js and PostgreSQL. Connects to the WhatsApp Business API with live message status over Socket.io, suggests replies and updates deal stages with an LLM (Groq), and bills through Stripe subscriptions with plan limits. In production.
- **CodeLens**, a GitHub App that reads pull-request diffs, gets a structured review from the OpenAI API and blocks the merge when it finds high-severity issues. Webhooks are verified with HMAC, a live dashboard runs on server-sent events.

**Independent Software Developer, alongside M.Sc. studies** 02/2024 – 03/2026

*Berlin, Germany*

- **FundFlow**, a multi-tenant fund management platform (NestJS, Next.js, PostgreSQL, FastAPI) with separate GP and LP portals, role-based access, per-tenant data isolation, cap table tools, e-signatures and automated capital calls.
- **AgentFlow**, an AI agent platform with custom prompts, tools and retrieval over PDF, CSV and text files (pgvector). Type-safe API with tRPC and Zod, answers streamed to the browser.
- **PulseVC**, portfolio analytics with revenue forecasting (Prophet), anomaly detection and clustering, plus questions in plain language on uploaded data.

**Software Developer (remote)** 10/2022 – 01/2023

*T12 (formerly Two12)*

- Cleaned up a legacy financial codebase: split oversized modules, removed duplicated code and added unit tests.
- Reworked slow and inconsistent REST endpoints with standard response shapes and error handling for the React frontend.
- Built features for the equity side of the product: capital call calculations, 409A valuation workflows and cap table dilution modelling.

**Senior Software Engineer** 01/2022 – 09/2022

*Netsmartz, Chandigarh, India*

- Wrote REST APIs in Node.js and Express on MongoDB and Redis for high-traffic applications, using caching and load balancing.
- Set up GitHub Actions pipelines and Docker containers for zero-downtime deployments, wrote Jest tests and reviewed code.
- Found performance bottlenecks on AWS (EC2, ECS, Lambda) and fixed them, which improved speed and reduced cloud costs.

**Senior Associate** 07/2020 – 01/2022

*SmartData Enterprises, Mohali, India*

- Led backend work on Node.js microservices for multi-tenant enterprise B2B SaaS products.
- Designed PostgreSQL and MongoDB schemas for high-volume concurrent workloads and used message queues.
- Built React/TypeScript frontends with Redux, ran AWS (EC2, SQS, Lambda, ECS) and GitLab CI/CD.

**Software Developer** 03/2018 – 06/2020

*VenturePact, Jalandhar, India*

- Built B2B SaaS features with Angular, Node.js and Express, including REST APIs and automated tests.
- Integrated HubSpot, Salesforce and Marketo through their APIs to keep customer data in sync.

**Software Developer** 01/2017 – 02/2018

*Nascenture, Mohali, India*

- Web applications for several clients with PHP, MySQL and MongoDB.

**Web Developer** 05/2015 – 06/2016

*Netmax Technologies, Chandigarh, India*

- Websites and web applications with PHP, MySQL and JavaScript at an agency, with several projects running in parallel.

## EDUCATION

**M.Sc. Information Technology Management** 02/2024 – 03/2026

*Berlin School of Business and Innovation, Berlin*

- Focus: software architecture, cloud computing, IT project management.

**Electromobility studies, FAU Erlangen-Nürnberg** 02/2023 – 01/2024

*Erlangen, Germany*

- Left after about a year to move into IT Management, which is closer to my software background.

**B.Tech. Computer Science and Engineering** 07/2011 – 05/2015

*Beant College of Engineering and Technology, India*

## TECHNICAL SKILLS

| | |
|---|---|
| **Languages** | TypeScript, JavaScript, Python, SQL |
| **Backend** | Node.js, NestJS, Express, FastAPI, REST, WebSockets, GraphQL |
| **Frontend** | React, Next.js, Redux, Tailwind CSS |
| **Databases** | PostgreSQL, MongoDB, Redis, pgvector, Prisma |
| **Cloud and DevOps** | AWS (EC2, ECS, Lambda, S3, SQS), Docker, GitHub Actions, GitLab CI/CD |
| **AI / LLM** | OpenAI API, Claude API, Groq, RAG, vector search |
| **Architecture** | Microservices, event-driven design, multi-tenancy, JWT, OAuth2, RBAC |

## LANGUAGES

| | |
|---|---|
| **English** | Fluent, used professionally |
| **German** | A2, currently learning |
